

# THE PERIODIC TABLE OF THE ELEMENTS

1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18

NOTES: For elements with more than one allotrope, the properties of the most common allotrope are given. Different allotrope may have differing melting points, boiling points, and densities. The discoveries of elements 113, 115, 117 & 118 have yet to be confirmed, and as such their names and symbols are only placeholders until official names are designated.
