

In the Name of God
Final Exam for Pre – University Students /Book One

Part One : Reading Comprehension

A: Read the following paragraphs and choose the best answers.(4 points)

The environmental matters that is worrying me most is the pollution of the sea. I think that the pictures we saw recently on the TV news while Easter holidays, still exist in our minds; all the accidents of the sea's vital and natural resources are caused by letting petrol - oil into the sea from big tankers. Concerning the fact that every day a big part of the sea is destroyed from similar accidents which happen all over the world, we could measure that in a half century there will be no part of the sea without pollution. As a result, fish which is one of the healthiest foods will be unsuitable for people. Furthermore, many kinds of the seas' vital and natural resources will disappear, people won't be able to swim and entertain themselves at sea and so on. Some possible solutions of **these misfortunes** are: **1)** careful control of ships, which carry dangerous things, **2)** all factories must clean their unwanted materials which are near the sea and **3)** research must be done by scientists in order to find ways for cleaning the already polluted parts.
