Global warming brings with it no guarantees. We don't know (30) what will happen – what the effects will be – nor do we know where or when they will make problems. But scientists and researchers from different (31) tell us that the possible effects of climate change could be big and in some cases, would cause (32) ... problems. Among the possible effects are ... (33)... number of human deaths and ...(34)... of groups of animals and plants. With this in ...(35), we have to think of the costs of action and weigh them against the risks of inaction.

C. Reading Passage

Read the following passage and match each paragraph with one of **the headings**. Write **the letters** (A, B, C, D) in front of the numbers of the paragraphs.

Headings

- (A) Crops and food supply are affected by global warming.
- (B) A rise in sea level is one of the results of global warming.
- (C) The effect of climate change on human health.
- (D) How climate change affects all living things.

36. Climate change may affect people's health both directly or indirectly. For example, heat stress and other heat related health problems are caused directly by warm temperature and high humidity. Untreated, heat stress can be a very serious medical problem. ()
37. Climate change may change the world's ecosystems – all living things are included in and rely on these places. Many of these places depend on a balance of rainfall, temperature, and soil type. A fast change in climate could upset this balance and put many living things in danger. ()
38. Global warming may make the sea level become higher. Why? Well, warmer weather makes glaciers melt. A glacier is a large sheet of ice that moves very, very slowly. Some melting glaciers add more water to the ocean. Warmer temperature also cause the water to expand. When the amount of water increases in the ocean, it takes up more space and level of the sea rises. ()
39. Global warming may make the Earth warmer in cold places. People living in these places may have a change to grow crops in new areas. But global warming also might bring damage to other places where we grow crops. In some parts of the world, people may not have enough food to eat because they cannot grow food that they need. ()

D: Reading Comprehension

Read the following passage and answer the questions as required.

Every day of your life, you use a kind of computer – your brain. Your brain tells you when you are hungry. It helps you to move to work and to remember things. Our brain can also solve difficult mathematical problems or calculations.

But sometimes we need to calculate more quickly than our brain can manage and be sure that the answer is correct. This is when we need computers which can solve problems and the most difficult calculations with high speed and no mistakes.

Computers are especially useful for storing a lot of information. They can keep

words, pictures and sounds in their memory and give the information you need within seconds. Even the most advanced computers are often easy to use. They communicate with you by flashing messages or pictures into a screen or sometimes they talk to you. You can play game with them too.

40. According to the passage, computers can solve problems the brain.

- a. faster than
- b. slower than
- c. more difficult than
- d. as fast as

41. We can understand from the passage that computers can

- a. work without the help of human
- b. store a lot of information
- c. keep sounds but not pictures in their memory
- d. do only simple calculations

True or False

42. According to the passage, your muscles tell you when you are hungry.

- a. True
- b. False

43. We understand from the text that some advanced computers are difficult to use.

- a. True
- b. False

44. According to the text, people can communicate and play games with computers.

- a. True
- b. False

45. We can understand from the passage that computers make mistakes.

- a. True
- b. False
